Xporter Documentation Home

Ever wanted to have a simple way to export an issue to a PDF, DOCX and XLSX with your own Layout? Now you can do it easily with Xporter for JIRA.

Xporter for JIRA is a add-on developed by Xpand Add-ons, an Atlassian Solution Partner. More information about Xporter for JIRA is available in the Add-on Homepage, including the license purchase process.

Overview

Xporter for JIRA is an add-on that helps you create documents using information from JIRA Issues.

With Xporter you are able to export:

- Native and custom Issue fields
- Issue Links (Linked Issues)
- Issue Comments
- Issue Worklogs
- Issue Subtasks
- Issue Components
- Issue Status Transitions
- Issue Attached Images
- Issue Attachments

You can also create awesome documents, for example:

- A custom project changelog
- A custom product improvement document
- Release notes in a custom format
- Requirements document to use in Scrum meetings
- Create a letter from an issue based on a template
- Software documentation

Documents can be generated from a single or multiple issues. Also, you can define workflow post-functions to generate documents when a Workflow transition happens. These documents can be sent via e-mail or placed on a File Server.

Schedule document generation using Xporter, for example, to follow your project status. Receive these documents via e-mail our send them to a File server like FTP or Confluence.

Xporter is available for **JIRA Server** and **Cloud** versions in **English**, **French**, **German** (available soon on the cloud) and **Spanish** (available soon on the cloud).

Feel free to contact us and we will be glad to help you or just answer your questions or even make a demo.

Discover why so many people and organizations choose Xporter for JIRA, every single day.
