

v1.1.7-AC (1.10.0) - March 11th, 2019 - Minor Update

11 March 2019

The Xporter team announces the release of **Xporter for Jira Cloud v1.1.7-AC (1.10.0)**. This release contains several new features.

- [Highlights for this release](#)
 - [New "Integrations" section on App Administration](#)
 - [Tempo Timesheet Integration](#)
 - [Improvements on "Single Issue Export" Panel](#)
- [New Features and Bug fixes](#)

Highlights for this release

New "Integrations" section on App Administration

With this new section, you can browse for available Xporter integrations. You can find more documentation about them and also set up the integration in case it's necessary.

More information about this can be found [here](#).

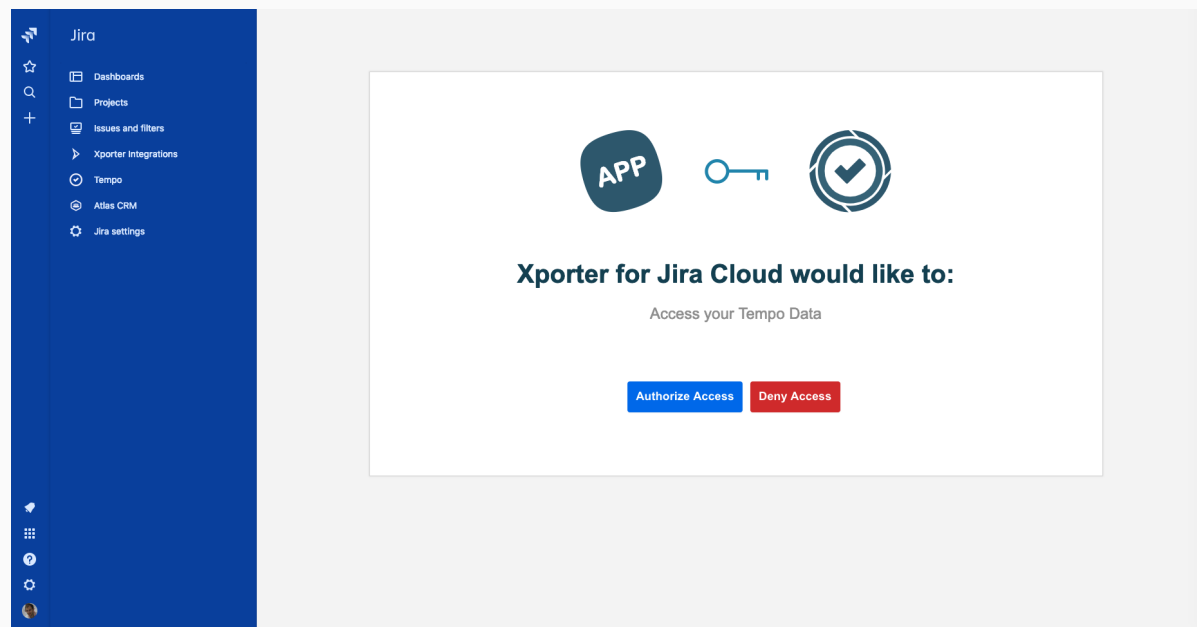

The screenshot displays the Jira Software App Administration interface. On the left is a dark blue sidebar with a navigation menu. The 'Integrations' option is highlighted with a red rectangle. The main content area, titled 'Integrations', features five integration cards arranged in a grid. Each card includes an icon, the integration name, a brief description of its functionality, and a 'Documentation' link. The integrations shown are Jira Service Desk, Atlas CRM, Gliffy Diagram, Confluence, and Tempo Timesheets. The Tempo Timesheets card also includes a green toggle switch and a 'Reconfigure' button.

Integration	Description	Documentation
Jira Service Desk	Export Jira Service Desk information using Xporter. Read our documentation to know more about this.	Documentation
Atlas CRM	Export Atlas CRM information using Xporter. Read our documentation to know more about this.	Documentation
Gliffy Diagram	Export Gliffy diagrams using Xporter. Read our documentation to know more about this.	Documentation
Confluence	Export Confluence pages using Xporter. Read our documentation to know more about this.	Documentation
Tempo Timesheets	Make time tracking easy for everyone in Jira and produce reliable data for powerful reporting, invoicing, and...	Documentation Reconfigure

Tempo Timesheet Integration

Xporter for Jira Cloud now integrates with Tempo Timesheets! This integration allows you to export the **Billable Seconds** field from Tempo Timesheets along with other data.

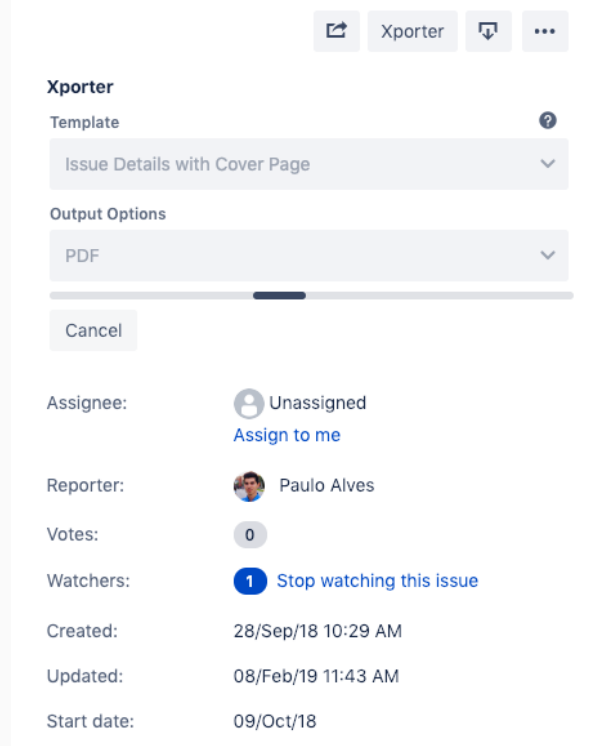

More information about this integration can be found [here](#).

Improvements on "Single Issue Export" Panel

The **Single Issue Export** Panel was improved, supporting large exports which are already available through Multi Issue Export.

It's possible to check the exportation progress and also cancel the exportation.
