

Documentation

In this screen, you will be able to check every feature and resources from Xporter.

The screenshot displays the Xporter for Jira web application. On the left is a dark blue sidebar menu with the following items: Jira, Jira settings, Apps, ATlassian Marketplace (Find new apps, Manage apps, OAuth credentials), XPORTER (Miscellaneous, Templates, Permission Schemes, File Servers, Integrations, and **Documentation** which is highlighted with a red rectangle), XRAY (Miscellaneous, Test Types, Test Environments, Test Statuses, and Test Step Statuses), and a bottom section with a magnifying glass icon and MF. The main content area is white and features a top section for creating a report with fields for Type, Priority, Labels, Sprint, and Description, each with a selection of icons. Below this is an 'Attachments' section with a large text box and a 'Drop files to attach, or browse' prompt. A right-hand panel titled 'Xporter for Jira' contains a 'Template' dropdown (set to 'Issue Details with Cover Page'), 'Output Options' (set to 'DOCX (Word)'), an 'Export' button, and fields for 'Assignee' (Unassigned) and 'Reporter' (Paulo Alves). The bottom section of the main area contains six cards: 'Admin Guide' (Help your team improve their reporting...), 'User Guide' (Eager to create awesome reports? Learn how to use Xporter...), 'Templates' (Templates make everything easier and consistent...), 'Integrations' (You can also include data from other popular Jira Apps...), 'Xporter Academy' (Created to help customers understand the potential of the Xporter...), and 'MS Office Add-ins' (Everyone can now build beautiful custom reports in under 3 minutes...).

If Xporter Home menu is enable this page is only available there.
