

Xporter 6.2.0 Release Notes

11 November 2019

The Xporter for Jira team proudly announces the release of **Xporter 6.2.0**. This point release contains several new features and bug fixes.

If installing manually from the Atlassian Marketplace, please make sure you install the correct asset for your Jira version (i.e. 7.x, 8.x, datacenter) from the [releases page](#).

Highlights for this release

My Exports

With this new Xporter version, users will be able to continue working on their tasks while Xporter generates their reports. Xporter is now able to generate documents in the background and the results can be downloaded later.

Improvements on Xporter Issue Panel

The Xporter panel inside of the issue details screen got some improvements. With this new version, you can see the progress of the export process. Also, you can send the export to background processing and continue to export data using other templates and get the result later on My Exports screen.

Process Manager for Jira Administrators

Jira Administrator can now have an overview of all active Xporter export processes. This new feature allows administrators to cancel exports in progress.

 The Process Manager feature is only available on Data Center instances.

JQL Helper and Validator on Scheduled Reports

Jira and Project administrators can now take advantage of the JQL helper on Xporter Scheduled reports. Now, only scheduled reports with a valid JQL expression are allowed to be saved.

Add New Scheduled Report

Name *

Scheduled Report Demo

Description

Cron Type *

Basic

Advanced

Cron Expression *

0 0 8 ? * 2

This is the Cron expression that will decide the regularity of your Scheduled Report

Export Data

JQL

Filter

Xporter Reports

JQL *

project = Demo

Template

Issue List Excel

Output Format

PDF

Filename *

Filename of exported file

Condition

The condition will evaluate if you have at least one issue to export in order to generate the report

Enable

Scheduled Actions

Configure new scheduled action.

CreateCancel

Add New Scheduled Report

Name *

Scheduled Report Demo

Description

Cron Type *

Basic

Advanced

Cron Expression *

0 0 8 ? * 2

This is the Cron expression that will decide the regularity of your Scheduled Report

Export Data

JQL

Filter

Xporter Reports

JQL *

project =XPTO

JQL expression is invalid

The value 'XPTO' does not exist for the field 'project'.

Template

Issue List Excel

Output Format

PDF

Filename *

SampleReport.pdf

Condition

The condition will evaluate if you have at least one issue to export in order to generate the report

Enable

Scheduled Actions

Configure new scheduled action.
