

Smart Checklist

Xporter for Jira Cloud allows you to export all the information available on the [Smart Checklist for Jira. Enterprise](#) and [Smart Checklist for Jira. Free](#) apps.

Definition

This integration provides a set of global mappings, being able to get an overview of the Smart Checklist.

Field	Description
SmartChecklist	The raw markdown value.
SmartChecklistCount	The number of lines on the Smart Checklist.
SmartChecklist.Progress	The progress of the Smart Checklist, percentage of items marked as done.
SmartChecklist.CheckedCount	The number of Smart Checklist items completed.
SmartChecklist.UncheckedCount	The number of Smart Checklist items not complete.
SmartChecklist.ItemCount	The number of Smart Checklist items.

Expand to see the sample code

```
Raw markdown: ${SmartChecklist}
Number of lines in the Smart Checklist: ${SmartChecklistCount}
Progress: ${SmartChecklist.Progress}%
Number of items completed: ${SmartChecklist.CheckedCount}
Number of items not completed: ${SmartChecklist.UncheckedCount}
Number of items in the Smart Checklist: ${SmartChecklist.ItemCount}
```

Also, it's possible to get more details by iterating over all the lines of the Smart Checklist.

Smart Checklist Field	Description
Label	The label available on each line of the Smart Checklist.
Status	The status of the item can have one of the following values: Todo, Skipped, In Progress or Done.
Checked	True if the Smart Checklist Item is completed.
IsItem	True if the Smart Checklist object is an Item.

Expand to see the sample code

```
#{for SmartChecklist}
    ${wiki:SmartChecklist[n].Label}
    ${SmartChecklist[n].Status}
    ${SmartChecklist[n].Checked}
    ${SmartChecklist[n].IsItem}
#{end}

or

#{for <VariableName>=FieldNameCount}
    Content and Issue Mappings. Example: ${FieldName[VariableName].Field}
#{end}
```

Example

Let's use this integration to export data from Smart Checklist.

ACD-1

Tincidunt arcu non sodales neque sodales ut etiam sit amet

Attach

Create subtask

Prepare branch

- merge feature to master
- set tag
- update [changelog](#)

Deploy

[Todo]

Deploy master to prod

[Todo]

Deploy new login page

[Todo]

Test and confirm successful deployment

[Todo]

Send ~~external~~ announcement to customers

In order to get the same result on your generated document, check the template used:

Smart Checklist.docx

Note

This integration gives the ability to customize the way how the Smart Checklist is displayed.

You can define in your template which type of data you want to export:

- Use your own checkbox;
- Export only the checkable items;
- Export all the information, with checkable and non-checkable values;
