

v1.1.16-AC (1.16.0) - March 14th, 2020 - Minor Update

The Xporter team announces the release of **Xporter for Jira Cloud v1.1.16-AC (1.16.0)**. This release contains new features and improvements:

- [Highlights for this release](#)
 - [Xporter configuration on Project Level](#)
 - [Permission Schemes improvement](#)
 - [Support CSV templates](#)
 - [Integration with Issue Checklist](#)
 - [Integration with Smart Checklist](#)
 - [Xporter Academy](#)
- [New Features and Bug Fixes](#)

Highlights for this release

Xporter configuration on Project Level

Xporter configuration is now available on the project level. Project Administrators are now able to manage Templates and Permission Schemes on the project level.
Jira Administrators can enable and disable the project level configurations.

The screenshot shows the 'MOON Software project' interface. On the left is a sidebar with navigation options: Back to project, Fields, Versions, Components, Permissions, Issue security, Notifications, Issue collectors, Xporter (highlighted), Development tools, Issue Checklist Free, Tempo, Accounts, and Xray Settings. The main content area is titled 'Templates' and features a search bar and a table of installed templates.

Name	Scopes	Last Modified
Basic Release Notes BasicReleaseNotes.docx A template that can be used to produce friendly release notes with tables for each issue type of the release.	INSTALLED FROM STORE BULK EXPORT SINGLE EXPORT	• Mário Jorge 22 Jan, 2020 11:06
Issue Details IssueDetailsWithCover.docx A template with a cover page, exports issue fields, sub-tasks, linked issues, comments and images. This template has been designed to be used in single issue export. It can be used in multiple issues export, but the cover page will be shown as many times as the issues being exported.	INSTALLED FROM STORE SINGLE EXPORT	• Mário Jorge 22 Jan, 2020 11:06
Issue List Excel IssueListExcel.docx A template to retrieve all the issues for this project.	INSTALLED FROM FILE UPLOAD EVERYWHERE	• Paulo Alves 26 Nov, 2019 14:15

Navigation: Prev 1 Next

The screenshot shows the 'Edit Permission Scheme - Scheme with tasks and bugs' interface. The left sidebar is identical to the previous screenshot, with 'Xporter' highlighted. The main content area is titled 'Permissions' and includes sections for 'Issue Types', 'Rules', 'Groups', and 'Mapping of Issue Types to Templates'.

Issue Types

Issue Types allowed to be exported: Task, Bug

Rules

Rules allowed to use Xporter: Administrators, Service Desk Team, Service Desk Customers

Groups

Groups allowed to use Xporter: Administrators, Release Administrators

Mapping of Issue Types to Templates

Issue Types	Templates
Task	Issue Detail Excel
Bug	Issue Details with Cover Page, Issue Detail Excel

Buttons: Confirm, Cancel

Permission Schemes improvement

Permission Schemes are now even more advanced. Now you can define multiple Permission Schemes per project and a Permission Scheme as default.

Support CSV templates

Xporter supports now CSV templates.

Integration with Issue Checklist

With [Issue Checklist](#) App you can create checklists for Acceptance Criteria, Definition of Done or Todo lists using Templates and Markdown.

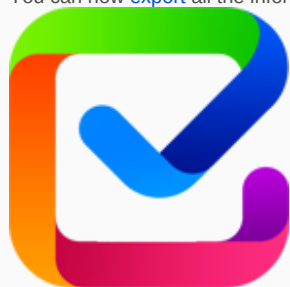

You can now [export](#) all the information you need.

Integration with Smart Checklist

With [Smart Checklist](#) App you can create checklists for Acceptance Criteria, Definition of Done or Todo lists using Templates and Markdown.

You can now [export](#) all the information you need.

Xporter Academy

We are proud to introduce the [Xporter Academy](#). Use this collection of online materials with practical exercises and tips to better understand Xporter and make the most of it.
