

Xporter 6.6.0 Release Notes

Xpand IT is proud to announce the release of **Xporter 6.6.0**

The main goal for this version is to turn Xporter ready for the Cloud Migration process.

As part of our continuous improvement, bug fixes have also been included in this version.

Highlights

Server to Cloud Migration

This new release is ready for the Server to cloud migration process. When Atlassian releases the official release of Cloud Migration Assistant, Xporter will be ready.

Once this, the Jira administrator will be able to migrate Xporter server data to the cloud instance when a Jira migration plan is done.

Read the [Server to Cloud Migration](#) page to learn more about the migration process and the process itself.
