

v1.1.17-AC (1.21.0) - February 27th, 2021 - Minor Update

The Xporter team announces the release of **Xporter for Jira Cloud v1.1.17-AC (1.20.0)**.

- [Highlights](#)
 - [Support Xray Test Runs Custom Fields](#)
 - [Filter images and/or links when retrieving a wiki markup field](#)
 - [Improved Permission Schemes UX and performance](#)
- [New Features and Bug Fixes in this release](#)

Highlights

Support Xray Test Runs Custom Fields

Now it's possible to export the Xray Test Runs custom fields along with the standard fields

Filter images and/or links when retrieving a wiki markup field

Now it's possible to choose if some wiki field should be retrieved with the images or links or if they should be skipped.

Improved Permission Schemes UX and performance

Permission schemes page was improved to be more accessible and faster being capable to handle thousands of projects.
